

# WWF Biodiversity Risk Filter tool training

The WWF Biodiversity Risk Filter tool is designed to help you assess biodiversity-

related risks and dependencies at your suppliers' sites. This step-by-step guide will walk you through the process, starting with registration and login, followed by supplier site analysis.

By completing this learning plan, you will learn:

- How to assess biodiversity materiality risks at your suppliers' sites
- How to use the WWF Biodiversity Risk Filter to analyze biodiversity risks
- The importance of biodiversity risk management in your sustainable sourcing strategies.

## **1. Register and Log in:**

Use the WWF Risk Filter [Registration link](#) to create an account or log in. Watch the 2-minute [Login Video](#) for guidance.

## **2. Add Portfolio Manager Company Name:**

After logging in, add your company name in the Portfolio Manager. For detailed steps, refer to the [How to Add Company Name video](#).

## **3. Upload Site Data:**

You can either upload data for a single site or multiple sites. For single site upload, refer to the [How to Upload a Single Site video](#). For multiple site uploads, watch the [How to Upload Multiple Sites video](#).

## **4. Analyze and Understand the Risk Assessment:**

After uploading the data, the tool will assess the risks associated with your supplier sites. For a detailed explanation of the risk analysis output, watch the [How to Analyse the Risks video](#).

## **5. Interpret Results:**

Use the data to understand key biodiversity risks and create mitigation strategies. See this [Interpretation Guide](#).
